ABOUT ME

I am a computer engineer with over 6 years' experience in the IT industry and finally managed to undertake training to become a developer which I am very passionate about. I have consistently demonstrated a commitment to excellence, a passion for technology, and a relentless drive for self-improvement, which led me to embarking on an exciting transition into the realm of web development, aligning with my profound interest in the digital landscape. This transformation coincided with my relocation to the United Kingdom in February 2022, adding a global dimension to my expertise. I have acquiring skills in HTML, CSS, JavaScript, React, Sass, and Bootstrap which is essential when working as a junior front-end developer. I am now looking to use my skills and experiences to gain a rewarding job role, where I learn and develop to help me within my career.
