ABOUT ME

I'm a Computer Engineer with a passion for Front-End Development, bringing over 6 years of diverse IT experience to the table. My journey in tech has been an exciting ride, filled with constant learning and growth.

I love crafting user-friendly websites using HTML, CSS, JavaScript, React, Next.js, and Tailwind. My background in IT support has given me a knack for problem-solving, which comes in handy when I'm debugging code or optimizing user experiences.

What really gets me excited is the chance to work on innovative projects that push the envelope in web development. I'm always eager to learn new technologies and techniques, and I thrive in collaborative environments where ideas flow freely.

I'm now looking for a role where I can put my unique blend of IT coordination and front-end development skills to good use. My goal? To create digital solutions that not only work great but also delight users. Let's build something amazing together!
